Features of New Range

Recessed Door Handle with Key Lock

Sequential Self Closing Doors

Self Latching Door

Heavy Duty Packaging

Pratt Safety Systems is proud to introduce our new range of Indoor Dangerous Goods Storage Cabinets with new and updated features.

Pratt Safety Systems has been manufacturing and distributing our cabinets throughout Australia and the Pacific region for over 30 years. Pratt Safety was the first company to introduce these cabinets into Australia and has maintained a leading standard of products and service.

All of our cabinets are designed and manufactured to comply with all of the relevant Australian and New Zealand Standards. Refer to the respective Standards for further specifications and conditions of use.

Features and Benefits

New Features

- Heavy Duty Packaging**
 The unique fully enclosed heavy duty honeycomb core cardboard packaging is mounted on a custom made wooden pallet, providing greater protection of cabinets during storage and transport.
- Powder Coated Paint Finish**
 Internal and external powder coated finish for improved chemical resistance.
- Recessed Handle**
 New recessed handle with key lock to eliminate potential damage from heavy knocks.
- Keyed Alike**
 2 Keys supplied with each cabinet. (Cabinets with locking handles only)
- Self Latching Door**
 Spring loaded 3 point self latching door mechanism for fault free latching action.
- Slide Control Arm**
 All single door cabinets now include a slide control arm to prevent the door from being over extended.

General Structure

- 50mm Vent Bungs**
 Fitted into side walls for venting of cabinets where required. Also includes a proven flash arrester in each vent with sealed enclosure in cavity between walls. Each vent is supplied with resealable metal caps.
- Double Steel Walls**
 Constructed using 1.2mm thick, double steel walls with 40mm air gap between walls to provide thermal insulation.
- 150mm Deep Liquid Tight Sump**
 For containment of leakage or spillage.
- Static Earthing Connection**
 Now also including earthing wire with each cabinet to help reduce the potential buildup of static electricity, a known source of ignition.
- Classification Labels**
 All appropriate class labels, capacity labels, identification and instruction labels are applied to each cabinet.

Shelves

- Heavy Duty Perforated Steel**
 1.6mm thick perforated galvanised steel shelves provide added strength and free air movement within the cabinet (All shelves are pre-fitted to cabinets and additional shelves are available if required).
- Fully Adjustable Shelves**
 90mm shelving increments for large cabinets and 45mm for medium and small cabinets.

Doors

- Self Closing Doors**
 All two door cabinets incorporate Pratt's unique and improved sequential self-closing door action, providing hands free closing and ensures doors close in the correct sequence.
- Hydraulic Door Closures**
 With speed control adjustment for a gentle closing action.
- Continuous Piano Hinge**
 Continuous piano hinges for reliability of action.
- Rounded Corners**
 All doors have rounded corners for added safety.

Flammable Liquid Storage Cabinets

Pratt Indoor Flammable Liquid Storage Cabinets comply with the Australian Standard AS 1940 "The Storage and Handling of Flammable and Combustible Liquids".

This range of cabinets is for the storage of flammable or combustible liquids as classified by the United Nations criteria and the ADG Code for Dangerous Goods.

These include flammable liquids such as Paints, Solvents, Petrol, Thinners, Kerosene, Turpentine, White Spirits, Alcohol and Ethanol.

Also combustible liquids such as Diesel, Linseed Oil and Pine Oil.

Note: 1. For all two door cabinets, the internal height is taken from top of sump sill/bottom shelf to the sequential chassis assembly.
 2. For all single door cabinets, the internal height is taken from the top of the sump sill/bottom shelf to the ceiling.
 3. For total external width measurement, add 6mm per vent bung for tight clearance locations.

Corrosive Storage Cabinets - Metal

Pratt Indoor Corrosive Substance Storage Cabinets comply with AS 3780 "The Storage and Handling of Corrosive Substances".

This range of cabinets is for the storage of corrosive substances in liquid or solid form as classified by the United Nations criteria and the ADG Code for Dangerous Goods. These include chemicals such as Acids, Alkalis, Caustics, Sodium Hydroxide Solution and Hypochlorite Solution.

Special Features:

- ▲ Cabinet doors are fitted with an all stainless steel piano hinge for added protection.
- ▲ Internal door opening latch (as required by the Standards).
- ▲ Each shelf is supplied with plastic spill trays to contain small spills and leakage.
- ▲ Additional powder coating of the shelving and closing assembly for added protection.

* AS 3780 specifies a maximum of 50kg or L for Packaging Group I Corrosive Substances and 250kg or L for Packaging Group II.

Note: 1. For all two door cabinets, the internal height taken from top of sump sill to the sequential chassis assembly.

2. For all single door cabinets, the internal height is taken from the top of the sump sill to the ceiling.

3. For total external width measurement, add 6mm per vent bung for tight clearance locations.

Corrosive Storage Cabinets - Polyethylene

Pratt Indoor Polyethylene Corrosive Substance Storage Cabinets also comply with AS 3780.

They are manufactured from polyethylene plastic material which provides superior resistance for the storage of corrosive chemicals. These include chemicals such as Sulphuric Acid, Hydrochloric Acid, Nitric Acid and other substances highly aggressive to metal.

Special Features:

- ▲ Constructed with 19mm thick polyethylene plastic sheet material including frame, door/s and shelves.
- ▲ Acid resistant liquid tight seal in all panel joints.
- ▲ Self-closing door/s with internal door opening latch.
- ▲ 150mm deep liquid tight sump.
- ▲ Self latching handle with key lock.
- ▲ Venting kit supplied with all models (may be fitted at installation if required).
- ▲ Some models feature separate compartments, permitting the storage of both acids and alkalis.

* AS/NZS 4452 specifies a maximum of 25kg or L for Packaging Group I and 50kg or L for Packaging Group II Toxic Substances.

Note: 1. For all two door cabinets, the internal height is taken from top of sump sill to the sequential chassis assembly.

2. For all single door cabinets, the internal height is taken from the top of the sump sill to the ceiling.

3. For total external width measurement, add 6mm per vent bung for tight clearance locations.

Oxidizing Agent Storage Cabinets

Pratt Indoor Oxidizing Agent Storage Cabinets comply with the Australian Standard AS 4326 "The Storage and Handling of Oxidizing Agents".

This range of cabinets is for the storage of Oxidizing Agents in liquid or solid form as classified by the United Nations criteria and the ADG Code for Dangerous Goods.

These include chemicals such as Hypochlorite-inorganic, Hydrogen Peroxide, Perchlorites-inorganic and Potassium Nitrate.

Special Features:

- ▲ Cabinets are fitted with a non latching door/s.
- ▲ Includes recessed handle without key lock facility.
- ▲ Includes magnetic catch that will release in the event of a build-up of pressure within the cabinet (as required by this Standard).

3. For total external width measurement, add 6mm per vent bung for tight clearance locations.

Organic Peroxide Storage Cabinets

Pratt Indoor Organic Peroxide Storage Cabinets comply with the Australian Standard AS 2714 "The Storage and Handling of Organic Peroxides".

This range of cabinets is for the storage of organic peroxides in liquid or solid form as classified by the United Nations criteria and the ADG Code for Dangerous Goods.

These include chemicals such as Acetyl Acetone Peroxide, Methyl Ethyl Ketone Peroxides and Dibenzoyl Peroxide.

Special Features:

- ▲ Cabinets are fitted with a non latching door/s.
- ▲ Includes recessed handle without key lock facility.
- ▲ Includes magnetic catch that will release in the event of a build-up of pressure within the cabinet (as required by this Standard).

Class 4 Dangerous Goods Cabinets

Pratt Indoor Class 4 Storage Cabinets comply with the new Standard AS/NZS 5026 "The Storage and Handling of Class 4 Dangerous Goods".

This range of cabinets is for the storage of Class 4 chemicals in liquid or solid form as classified by the United Nations criteria and the ADG Code for Dangerous Goods. Please refer to the Standard.

These include the following divisions:

- Flammable Solids
- Spontaneously Combustible
- Dangerous When Wet

Special Features:

- ▲ Cabinets are fitted with a non latching door/s.
- ▲ Includes recessed handle without key lock facility.
- ▲ Includes magnetic catch that will release in the event of a build-up of pressure within the cabinet (as required by this Standard).

Gas Cylinder & Aerosol Storage Cages

A secure and cost effective solution for safely storing a wide range of gas cylinders

Pratt Safety Systems offers a comprehensive range of Gas Cylinder Storage Cages to suit most storage requirements. Whether it is for storing Aerosol Cans, Gas Cylinders, Forklift Gas Cylinders or a mixture, Pratt Safety Systems has a solution for you.

All Pratt Gas Cylinder Storage Cages comply with the requirements of Australian Standard AS 4332 and AS/NZS 1596. Refer to these standards for more specific storage requirements and compliance.

Pratt Safety Systems has a reputation for also providing a comprehensive range of high quality Dangerous Goods Chemical Storage Cabinets complying with all relevant Australian Standards.

Ideal for storing tall sized cylinders, forklift cylinders and aerosols.

PSGC4A

Features include:

- ▲ Yellow powder coated steel construction, suitable for outdoor environments.
- ▲ Solid steel roof and floor, with steel mesh sides to provide ventilation.
- ▲ All wall panels and doors are made of welded steel mesh within a sturdy steel frame for added strength.
- ▲ Strong magnetic door catches to hold doors closed and an eye lug for a padlock.
- ▲ Raised support legs with pre-drilled feet which can be permanently fixed to the ground. (Recommended)
- ▲ Capable of being moved by forklift for relocation if required. Note – only when cage is empty of cylinders.
- ▲ Available in a range of configurations for tall gas cylinders and forklift gas cylinders.
- ▲ Tall forklift cylinder storage cages include shelf to provide storage on two levels.
- ▲ Restraining chain to prevent cylinders from falling.
- ▲ Supplied fully assembled for immediate installation and use.
- ▲ Includes appropriate safety signs.

Note: The storage of cylinders should preferably be located out-of-doors in a well ventilated area away from any flame, heat or other ignition sources. Flammable gases and oxidizing gases shall be kept in storage at least 3 metres apart. Please refer to both AS4332 and AS/NZS 1596 for further information on correct storage requirements.

Features include:

- **Comprehensive range of models**
To suit wide variety of applications.
- **Structural components made of 304 stainless steel**
For strength and durability.
- **316 stainless steel stay-open valves**
For dependable operation and performance.
- **Shower head made of AES plastic or optional 316 stainless steel**
With a unique conical water pattern to gently deliver large volumes of water ensuring complete decontamination.
- **Shower flow control regulator**
This assists to provide simultaneous flow between shower and eyewash.
- **Interchangeable nozzles**
For converting from an eye wash to an eye-face wash.

Features

Deluge Plastic Shower Head

Deluge Stainless Steel Shower Head

Aerostream Triple Nozzle (Aerated)

Aerostream Single Nozzle (Aerated)

Pratt Emergency Showers & Eye Wash Stations are made of high quality stainless steel & durable plastic materials for a long & dependable life.

With a wide range including safety deluge showers, eyewashes, eye/face washes, portable, hand held and combination units, Pratt Safety Systems can provide you with strong and reliable equipment for any workplace requirements. You have a peace-of-mind knowing that you're providing your employees with the best in initial first aid treatment for chemical burns and injuries.

Whether manufacturing, handling or storing chemicals, it is essential to have the right emergency safety equipment available. Emergency Showers & Eye Wash Stations are recommended by Medical Practitioners, Standards and Workplace Regulations .

All Pratt Emergency Showers and Eye Wash Stations designed and manufactured to comply and exceed the requirements of Australian Standard AS4775. This also makes them compliant to American ANSI Z358.1 Standards.

Aerostream Technology

Pratt's Eye-Face Wash and Eye Wash Nozzles deliver a gentle cascade of aerated water to rinse away contaminants without further damaging delicate eye and skin tissue.

- The Eye/Face Wash nozzle (top right) includes 3 aerators with a self closing dust cover. This acts as a deflector creating a sheet of aerated fluid which covers the whole face and eyes together. A nozzle is positioned on each side to provide full facial coverage.
- The Eye Wash nozzle (bottom right) includes 1 aerator with a protective dust cover. This provides a stream of aerated fluid which is directed at the eyes for maximum irrigation. A nozzle is positioned on each side to provide full coverage to both eyes.
- Note that the nozzles are interchangeable if required, as the base has the same mounting connections.

Aerostream Eye-Face Wash Nozzle

Aerostream Eye Wash Nozzle

Combination Showers & Eye Wash Stations

Convenience of one unit incorporating both a deluge shower and with an eye or eye-face wash with only one water supply connection required.

Pratt Combination Shower and Eye Wash or Eye-Face Wash Stations, combine all of the features and benefits of the individual showers and eye washes in a single stand alone unit. Only one fluid supply connection is required. These are our most popular 9 models offering a comprehensive selection of 9 models in different configurations including eye wash or eye-face wash, with or without bowl and with or without foot treadle operation.

SE607*

*Signs not included, optional extra

316 Stainless Steel Combination Shower & Eye-Face Wash Station

This new model, based on the popular SE607, is constructed primarily using 316 grade stainless steel. This higher grade material provides greater corrosion resistance and a more durable shower unit, ideal for marine and harsh chemical environments. This model retains the AES plastic triple aerated eye-face wash nozzle assemblies to provide the optimum facial and eye irrigation.

SE607T316*

SE603*

SE612

SE616

SE675

SE685

Shower Flow Control Regulator

All Pratt Combination Shower Units are fitted with a flow control regulator, which limits the flow output to 90LPM. This ensures the shower will exceed the minimum required flow rate and allow the eye wash to operate simultaneously as required by the Standards.

Adjustable Eye Wash Flow Control

All Pratt Combination, Eye-Face Wash and Eye Wash Stations incorporate an adjustable flow control. Other than model SE620, all units include an individual flow adjustment screw, located in the mounting base, which allows for the fine tuning of the flow output. Model SE620 features a central adjustable flow control, due to the twin nozzle design.

All Stainless Steel Combination Shower & Eye-Face Wash Station

This new model features all stainless steel construction primarily using 304 grade material with some further 316 grade components. This shower unit is designed for harsh conditions where brass and plastic materials are not appropriate or where full stainless steel construction is preferred. Includes a new dual soft stream non aerated eye-face wash assembly.

304 stainless steel construction including:

- ▲ Stanchion, bowl assembly, eye-face wash nozzle, pull rod & treadle.

316 stainless steel components including:

- ▲ Shower head, ball valves and other connection fittings.

SE620

Eye Wash Stations

Pratt Eye Wash Stations provide a soft flowing, single stream of aerated fluid to the eyes.

Pratt Eye Wash Stations are available in wall or pedestal mounted units, with or without bowl assembly, and with or without foot treadle activation. Each nozzle has a flip off dust cover.

Stainless steel construction provides superior long-life and reliability.

Laboratory Units

Even when working with small doses of dangerous substances, such as in a laboratory, a spill or splash could still cause a serious injury.

Pratt's Laboratory Eye Washes provide laboratory practitioners swift and effective first aid treatment for chemical injuries and burns.

Eye-Face Wash Stations

Pratt Eye-Face Wash Stations provide a broad soft flowing stream of aerated fluid coverage to the face and eyes.

This is critical, especially where severe irritant or corrosive chemicals are involved.

The eye-face wash nozzles feature three aerators and a self closing dust cover which further spreads the fluid stream for full facial coverage. Available in wall or pedestal mounted, and with or without a bowl assembly. Either version can also be provided with an optional foot treadle activation.

SE480

SE420

SE475

SE400

Safety Showers

Pratt Safety Showers rapidly remove contaminants from the body with a deluge of flushing fluid.

The shower head features an impeller which creates a swirling action of the flushing fluid to ensure whole body coverage. The shower head delivers a large volume flushing fluid spread evenly in a precise pattern and controlled flow rate.

Portable Units

With Pratt's Portable Units, you can have a safe workplace no matter where you are.

These portable units provide immediate on site water first aid treatment and are ideal for worksites without plumbing capabilities, as well as for fire and emergency teams, vehicles carrying dangerous substances and those working in remote places such as mining, agriculture and construction.

For more information, contact Pratt Safety Customer Service on 1300 133 226 or visit www.prattsafety.com.au

SE4764 - Water Preservative Solution - 4 pack 250ml bottles

Multi Spray Units

For the ultimate in Emergency Decontamination, Pratt's Multi-Spray Units provides a high volume fluid flow to provide full body coverage, for fast first aid treatment and decontamination when large volumes of chemicals are involved.

In these types of situations there may be the potential for contamination to the whole of the body. This may involve the storing and handling of dangerous substances such as acid, caustic, toxic and many other types of chemicals or molten materials such as in foundries.

Multi-sprays units are fitted with 16 shower heads for maximum coverage directing the streams of fluid from all directions from head to toe simultaneously. Guaranteed highest quality components, with mainly stainless steel construction for maximum durability and reliability.

SE663PO

- SE340PO - without eye/face wash
- SE670PO - with platform operated eye/face wash
- GSE670PO - with platform operated eye/face wash and alarm kits

Gravity Shower

This unique Pratt gravity fed emergency deluge shower and eyewash unit has been specifically designed for remote mining applications, where no plumbed water is available. The unit is of a heavy duty design which is cyclone rated making it ideal for areas in the northern areas of Australia which are prone to cyclones.

Features include:

- ▲ 2500 litre galvanised aquaplate tank.
- ▲ Heavy duty steel beam tank support frame.
- ▲ Corrugated steel canopy for added tank protection.
- ▲ Fluid level indicator.
- ▲ Ground level fill point.
- ▲ Vertical overhead supply emergency deluge shower . Complete with 200mm AES shower head, stay open ball valve and pull rod assembly.
- ▲ Eyewash with stainless steel bowl, hand and foot operated.

Pratt's Gravity Shower is designed to comply with AS4775 as the maximum volume of the tank will ensure a compliant flow rate in excess of the recommended 15 minutes flushing period.

1. All Pratt models are designed to exceed the minimum operating requirements of the Standards in order to provide the maximum benefits to the operator when used.
2. For the combination models the Recommended Minimum Fluid Supply is required in order for both the shower and eye wash to operate simultaneously.
3. For the fluid supply piping other factors may need to be considered, such as: available fluid supply flow rate & pressure, distance of piping, number of emergency equipment connections and other equipment or processes.
4. Do not connect to piping smaller than the recommended minimum size as this will affect the flow rate and performance of the emergency equipment.
5. Refer to AS4775 for further information, specifications, operating and maintenance requirements.

UltraTech Distributor

Pratt Safety Systems is the exclusive distributor for UltraTech International in Australia.

The founders of UltraTech International pioneered the field of spill containment products in the early 1980's. UltraTech was formed in 1993 with one goal in mind: to create the world's finest offering of spill containment and spill response products. Since then, its vision has expanded into additional product categories and the company now features a product line that consists of over 300 unique products.

Pratt Safety Systems is proud to be the exclusive distributor of UltraTech International's comprehensive range of spill containment products.

Wherever chemicals or hazardous substances are being stored, handled or transported, it is essential that all appropriate measures are in place for the containment of these chemicals/substances in the event of spill or leak. Pratt Safety Systems' extensive product range and wealth of experience ensures that we are able to provide our customers with a range of containment solutions to meet any need.

Features and Benefits

• **Quality of Strength**

Most Ultra Tech products are performance tested and provide a UDL (Uniform Distributed Load) rating. Not all manufacturers offer this level of strength performance specifications.

• **Quality of Materials**

All products moulded from 100% polyethylene plastic material which offers excellent resistance to a wide variety of chemicals.

• **Compliance Proven**

Most products meet a range of stringent USA regulations - SPCC, EPA Container Storage Regulations 40 CFR 264.175 and UFC Spill Containment Regulations, which exceeds any Australian requirements for spill containment.

• **Safety Yellow**

All yellow coloured polyethylene products are made from virgin grade materials for added strength, chemical resistance, long life durability and are easily recognisable.

• **Slip Resistant**

All polyethylene grates incorporate slip resistant, "Diamond Plate" surface design.

Since 1996, UltraTech has been developing Eco-Smart products using up to 100% recycled content. In fact, UltraTech was the first spill containment company to recognise the reduced environmental impact of products made using recycled materials.

• **Eco-Friendly**

Made with up to 100% of recycled resin for environmentally smart and friendly production.

• **Eco-Nomical**

Made with a cost effective method and recycled material for smart savings.

• **Eco-Logical**

Certain load bearing spill containment products may not be safe when using 100% resins. By logically blending the smart amount of virgin resin with recycled resin, UltraTech products offer maximum safety, structural integrity and long life that cannot be achieved by 100% recycled blends.

Throughout the brochure, you will see the Eco-Smart Logo to identify these products. Eco-Smart is also used to designate products that are biodegradable, phosphorus-free, use natural materials or assist in recycling.

Eco-Friendly + Eco-Nomical + Eco-Logical = Eco-Smart™

Drum Spill Containment

Standard Drum Spill Pallet

- ▲ Built for heavy loads and convenient handling.
- ▲ High load capacity – 1360 Kg. Supplied with Drain Plug.
- ▲ 100% polyethylene construction – compatible with a broad range of chemicals including acids and corrosives.
- ▲ 4 Drum Spill Pallet 1235 has a nestable design which allows multiple pallets to be shipped (or stored) in a minimal amount of space.

1011

1235

Spill Pallet Plus

Combines high strength and low-profile features while meeting EPA Container Storage Regulations.

- ▲ Nearly 50% lower than standard spill pallets, drum handling is safer and less strenuous.
- ▲ Can be forklifted, all-polyethylene construction.
- ▲ Removable grates feature a non-slip surface.

Note: When relocating by a forklift, always remove the loads before moving the spill pallet.

Hard Top Plus

Provides outdoor weather resistant storage for drum/s.

- ▲ Low profile allows for convenient and safe access to either a drum pump or waste funnel, when fitted.
- ▲ Unique dual closure offers significant ergonomic and convenience benefits - drums are easily accessed from either side.
- ▲ Roll-top covers can be easily lifted from waist height to access drum tops - no need to reach near ground level.
- ▲ Swing-out doors provide safety and convenience for loading or unloading drums.
- ▲ Can be forklifted, lockable, all-polyethylene construction - offers excellent chemical resistance, will not rust or corrode.

IBC Spill Pallets

IBC Spill Pallet Plus

Economical and portable containment for IBCs.

- ▲ Suitable for intermediate bulk containers (IBCs), drums or other large vessels. All substances stored must be compatible.
- ▲ Inner polyethylene columns feature a dense pattern of vertical ribs to provide superior strength and support for heavy loads. Refer to Uniformly Distributed Loads (UDL) in table.
- ▲ All grates and ribs are easily removed for cleaning.
- ▲ 100% polyethylene construction with no metal parts – offers excellent chemical resistance and will not rust or corrode. All IBC Spill Pallet Plus will provide years of service under rigorous conditions.
- ▲ Optional Shelf Bucket are available for model #1158 & #1144 – catches small leaks or spills during dispensing.
- ▲ Double Stack IBC #1058 features superior strength to accommodate two full IBCs.

Optional Bucket Shelf available #1160

IBC Spill Pallet Hard Top

Provides outdoor weather resistant storage for IBC tank/s.

- ▲ Upper roll-top door and lower swing-out doors combine to allow easy and convenient access to IBC.
- ▲ Low profile design provides safe material handling and dispensing.
- ▲ Hard Top models are lockable - allows safe material storing ; Available to be moved with forklift. 100% polyethylene design will not rust or corrode, provide years of service under rigorous conditions.

Note: When relocating by a forklift, always remove the load before moving the spill pallet.

Unique Modular IBC Spill Pallet - Indoor & Outdoor

- ▲ Indoor and outdoor models available for 2, 3, 4 or 5 tank storage.
- ▲ 100% polyethylene construction – eliminates the potential of rust and corrosion.
- ▲ Each IBC tank sits on a low-profile spill pallet with a containment capacity of 284L – Expansion Tanks provide 246L of addition capacity.
- ▲ “Flow through” bulkhead fittings connect spill pallets and Expansion Tanks together, allowing spills to be channelled throughout the containment systems – containment capacity is thereby “borrowed” from adjacent spill pallets and Expansion Tanks.

1125

Outdoor Model Features:

- ▲ Unique “roll top” enclosures and swing-out doors allow convenient loading and unloading of IBC tanks.
- ▲ Compartments are lockable for secure storage of hazardous materials.

Other Spill Products

Spill Decks

Low profile, modular spill decks allow you to design and create a containment system that meets your specific needs.

- ▲ Polyethylene construction meets a wide range of chemical compatibility needs
- ▲ Unique diamond plate surface design. Polyethylene grates are slip resistance to reduce slip hazards.
- ▲ Applications include hazardous waste collection, storage of chemicals, drum dispensing and battery storage.
- ▲ Optional Loading Ramp #1089 provides added drum handling safety and convenience.

Drum Truck

Drum Handling, Dispensing and Containment in One Unit.

- ▲ Convenient storage of drum in horizontal position for ease of decanting, whilst providing spillage or leakage containment.
- ▲ Open Spillage containment area, providing visual monitoring and ease of access for clean up purposes.
- ▲ For use with 205L drums includes nylon strap to keep drum secure.
- ▲ Large wheels roll easily over shop or factory floors to enable relocation as required, without the need of a forklift.
- ▲ Large capacity of 250L.

Spill Collectors

Spill Collectors

Mobile Secondary Container Provides Maximum Protection For The Inner Drum.

- ▲ Applications include satellite waste collections, general storage of chemical drums, and portable drum pumping stations.
- ▲ Rugged design allows Flat Bottom Model and Pallet Jack Model to be safely handled by forklift under top flange.

Spill Trays & Drum Funnels

Burp Free Funnel

- ▲ Burp-Free Funnel features a built-in vent. No more splashing or “burping” when pouring liquids!
- ▲ Threaded brass insert screws into 5cm drum bung or tank cap.
- ▲ Hinged, lockable lid prevents unauthorised access.

651

656

Containment Tray

Versatile secondary containment for small containers and packages.

- ▲ Low profile, 62L sump is perfect for containment of 20L pails, batteries, safety cans, dry cleaning waste drums, and leaky machine parts.
- ▲ Optional grating elevates containers from spilled liquid – features 52L capacity with grating.

2351

Octagon Drum Tray

- ▲ Designed to collect and obtain drips and overflows associated with filling of 205L and 60L drums.
- ▲ Optional bottom elevates drums 6.6cm and out of spilled liquid.

Bung Access Funnel

- ▲ The Ultra-Bung Access Funnel allows access to the 22.86mm drum bung.
- ▲ Unique zig-zag channelled surface diffuses splashing. Level surfaces allow filters, paint cans, buckets and bottles to remain upright while draining passively.
- ▲ Optional hinged cover keeps dirt and unwanted materials out of your waste stream. It's also lockable for secure drum management.

482

484

Pop Up Fill Gauge

- ▲ Installation of our Pop-Up Fill Gauge in the bung allows visual monitoring of waste level in the drum and helps you plan ahead for drum removal.
- ▲ It also eliminates the mess caused by overfilling.

9985

Pop Up Fill Gauge for Global & Bung Access Funnels

Global Funnel

- ▲ Securely fits nearly every 205L tight head steel or polyethylene drum manufactured throughout the world.
- ▲ Uniquely bottom designed fits tightly on drums with varying diameters – no more wobbles or drips!

Utility Spill Trays

Black Utility Trays

Keep messy drips and spills off warehouse and factory floors.

- ▲ Heavy-duty polyethylene construction – will not rust or corrode.
- ▲ Ribbed bottom keeps cans, pails and other containers elevated above small spills or leaks.
- ▲ Nestable for easy storage when not in use.

Lab Trays

Countertop spill collection trays safely store bottles, beakers and other lab wares.

- ▲ Assists decanting of small quantity liquids safer, cleaner, and more manageable.
- ▲ Features built-in pouring spout to conveniently remove spills.
- ▲ Designed for use in research, laboratory, medical, and industrial facilities.

Flexible Utility Trays

Convenient, compact, and foldable trays capture small leaks and spills.

- ▲ One-piece units – no components or pieces to lose.
- ▲ High visibility, PVC fabric provides rugged durability and excellent chemical compatibility.
- ▲ Utility tie provides easy and convenient storage and portability.

1335

Drum Rack Systems

Drum Rack

Polyethylene drum racks capture spills to keep your workplace clean and safe.

- ▲ All drum rack models tilt the drum slightly forward allowing maximum drainage – optimise your use of chemicals while minimising waste.
- ▲ Improves worker safety by keeping slippery chemicals and oils off the plant floor.

Drain Seals & Plugs

Drain Seals

Stop Spills From Going Down The Drain

- ▲ Reinforcing mesh is “sandwiched” between layers of polyurethane – increases durability and resistance to tearing.
- ▲ Urethane construction allows the pad to deform and seal off most drains - temporarily “seals” to any smooth surface. No specified “top” or “bottom”, both sides will quickly seal drains.

Drain Seal Plus Model features rugged, glassed fiber reinforced polyethylene top layer (Yellow) to provide protection from extended UV exposure and vehicular traffic.

2124 - 2125

2126 - 2132

2160 - 2167

2134 - 2137

Drain Plugs

Flexible Polyurethane plugs prevents contaminants from entering drains.

- ▲ Rigorous resistance against oil, water and most aggressive chemicals.
- ▲ Eyebolts are removable, allowing installation of grating Drain Plug in place.
- ▲ Non-absorbing material, easily cleaned for repeated use. Available in safety orange colour.

Ultra Sidewinder

Large

Protects cords & cables and avoids dangerous tripping hazards

Articulating Pratt pieces offer exclusive flexible design - curves, corners and s-curves are easily made while maintaining a completely flat profile.

Modular design makes it easy to reconfigure and replace targeted segments, even while the cable remains connected.

Simple installation - no tools required.
Fully customisable length.
